

Our Typical analysis includes Guaranteed Analysis information as well as typical nutrient information for vitamins, minerals, and amino acids. The information included in the typical analysis is compiled using lab analysis of our recipes and diets. A typical analysis does not contain absolute values, however it is useful for determining if a specific recipe is suitable for your pets needs. If you or your veterinarian need additional information please reach out. WWW.ACANA.COM

1 cup = 114 g of food

EVERY KITTEN IS DIFFERENT.

Just like you, your kitten is a unique individual, so feeding amounts will vary. Use this chart as an initial guide, monitor your kitten's weight, and adjust portions accordingly. Feed twice daily and always provide fresh, clean water.

*After 52 weeks, start gradual transition to any ACANA™ Cat recipe.

ACANA™ First Feast is formulated to meet the nutritional levels established by FEDIAF for Growth of Kittens.
